Response to Amendment

Applicant's arguments filed 9/6/07 have been fully considered but they are not persuasive.

Applicant argues that, "Claims 55-64 of the present application are patentably distinct from claims 1-10 of U.S. Patent No. 6,697,172. Claims 1-10 of U.S. Patent No. 6,697,172 are directed to a facsimile apparatus, In contrast, claims 55-64 of the present application are directed to a method for monitoring performance of an image forming apparatus. in view of the amendments to the claims and remarks hereinabove. Applicant submits that the application is now in condition for allowance".

Examiner disagrees and points out on the following action that the newly presented claims are obvious variations of the patent 6,697,172.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Correction

Done!

2. Claims 55-64 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,697,172. ~~Although the conflicting claims are not identical, they are not patentably distinct from each other because~~
Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention discloses in the instant application and the claims in the patent are obvious variant over each other. For example Claim 55 of the present invention discloses "(a) continuously monitoring use of an image memory of the image forming apparatus, and calculating a memory usage rate of the image forming apparatus, wherein file memory usage rate is a percentage of a time period that a percentage of the image memory in use during said time period is within a corresponding predetermined range of percentages" which reads on the claim 1 of the patent lines 5-11. And the limitation of "(b) storing performance measurement data corresponding to said memory usage rate calculated in (a)" which reads on the claim 1 lines 12-14. and the limitation of "(c) receiving a request for data transmission from a central data processing apparatus and in response to said request, reading said measurement data stored in (b) relating to said memory usage rate" which reads on the claim 1 lines 15-19. And the limitation of "(d) transferring said data read in (c) to said central data processing apparatus" ~~which~~ reads on claim 1 lines 20-22.

3. Claims 56-64 are also obvious variant of the claims on patent 6,697,172.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2625

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
